PROJECTS

GREEN CYCLE Lanka - (Frontend)/(Backend)

Developed a waste management system to collect garbage, categorize it, and ensure proper disposal. Recyclable materials are sent to recycling companies, while other waste is delivered to designated locations, promoting environmental sustainability.

Land-Selling Mobile Application

Built a mobile app using FXML and Kotlin that allows users to add, view, update, and delete land listings. I implemented a secure user login system to ensure proper access control and focused on creating a user-friendly design and seamless functionality to enhance the overall user experience.
